See advice in section 8

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for safe handling

Use only in well ventilated areas Prolonged or repeated skin contact should be avoided to minimise any risk of sensitisation Do not eat, drink or smoke when using the product. Wash hands before work breaks and after finishing work. Good industrial hygiene practices should be observed

7.2. Conditions for safe storage, including any incompatibilities

Store in original containers at 8-21°C (46.4-69.8 °F) and do not return residual materials to containers as contamination may reduce shelf life of the bulk product

8.2. Exposure controls

Respiratory equipment

Use only in well ventilated areas

Hand protection

Nitrile gloves are recommended. Chemical-resistant protective gloves (EN 374) Suitable materials for short-term contact or splashes (recommended: at least protection index2, corresponding to >30 minutes permeation time as per EN 374): nitrile rubber (NBR;>=0.4mm thickness) Suitable materials for longer, direct contact (recommendation: protection index 6, corresponding to >480 minutes permeation time as per EN 374): nitrile rubber (NBR;>=0.4mm thickness) This information is based on literature references and on information provided by the glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

Eye protection

Wear approved safety goggles.

Skin protection

Wear apron or protective clothing in case of splashes.
